IMPACT REPORT 2023

Our Approach to Impact and Sustainability

Our Approach to Impact and Sustainability

Working Toward Impact and Sustainability

At Finance in Motion, we integrate impact considerations into the entire investment cycle. We responsibly invest public and private capital where it is needed to address the world’s social and environmental challenges.

We focus our investments exclusively on emerging markets across five continents. Our funds under management/advisory target sectors with a high impact potential to positively contribute to addressing social and environmental challenges.

Their activities are clustered around two themes:

- Promoting a green economy, i.e. channeling capital to green sectors, including, for instance, sustainable agriculture and renewable energy; and
- Promoting entrepreneurship and livelihoods, i.e. channeling capital to small businesses and low-income households.

FINANCE IN MOTION'S IMPACT GOALS

All our work is geared towards one or several final impact goals:

- **Addressing climate change**
 We are committed to climate action. We provide dedicated financing for reducing CO₂ emissions – through energy efficiency measures and the production of renewable energy – and for storing and sequestering existing CO₂. Additionally, by investing in technologies to reduce the use of natural resources, we also support businesses and people in coping with the effects of a changing climate. Our funds as well as products under development align with the Paris Agreement goals.
- **Strengthening biodiversity conservation**
 We channel financing toward certified sustainable farming businesses that adhere to recognized best practices to help preserve or restore biodiversity-rich ecosystems. These include natural forests, mangroves, and other ecosystems.
- **Fostering sustainable use of (natural) resources**
 We promote the sustainable use of (natural) resources, such as water, energy and land, with dedicated funding. This reduces pressure on our planet and, at the same time, supports green economic growth.
- **Improving livelihoods**
 We direct capital to financially underserved groups, such as low-income and underbanked households to support them in strengthening economic resilience and taking up or expanding income generating activities.
- **Promoting economic opportunities**
 We expand the availability of financial services to micro, small, and medium enterprises. By helping local businesses grow, we promote economic development and employment opportunities from the ground up.

Our Approach to Impact and Sustainability

MANAGING IMPACT AND SUSTAINABILITY

Impactful investing takes intentionality, strategic focus, and continuous management. Our approach to managing impact and sustainability builds on a system that combines managing and mitigating potential negative outcomes with enhancing positive impact.

These considerations are integrated into the entire investment cycle – from setting out impact objectives and a thorough screening of potential investees, to continuous monitoring and management once capital has been deployed. We align with international initiatives, standards and good practices, including the goals of Paris Agreement Operating Principles for Impact Management (Impact Principles), the IFC Performance Standards, and key responsible standards and sustainable finance regulations, such as SFDR.

Managing positive impact

Measuring our positive impact allows us to track progress towards our impact goals and informs our strategy. We monitor the expected and realized impact of our managed/advised funds based on a set of industry-aligned key performance indicators, in line with the fund's impact objective and Theory of Change. We integrate systematic impact measurement and management throughout the investment lifecycle. The funds assess potential impact of each investment with our Impact Scoring Tool at the due diligence stage. The tool is also used for regular impact monitoring and ex-post assessment at the exit stage.

We combine a range of internal and external data sources to track the funds' progress toward their impact goals. Finally, our geographical proximity to investees and stakeholders through our network of local offices supports regular on-site visits and continuous dialogue, contributing both qualitative and quantitative impact information.

Managing environmental and social risks and impacts

We prioritize supporting each of our funds in effectively managing – i.e., avoiding, minimizing and mitigating – potential environmental, social, and governance (ESG) risks and negative impacts associated with their investments. This means Finance in Motion maintains and continuously improves our ESG management system.

Thorough due diligence helps identify ESG risks and impacts and assess the investee's capacity and commitment to address and mitigate these. Once capital is deployed, the investee's ESG performance is regularly monitored.

Impact Principles

In 2023, Finance in Motion underwent an independent verification by BlueMark. Its impact management system ranked 'advanced' (the highest rating possible) against the Impact Principles and current industry best practices. Finance in Motion received the highest score in all eight dimensions of the Principles and was designated as a "Practice Leader" by BlueMark for the third year in a row. Read Finance in Motion's Disclosure Statement on alignment with the Operating Principles for Impact management on our [website](#).

IMPACT REPORT 2023

About Finance in Motion

About Finance in Motion

Investing in the future we all need

As emerging markets evolve, they create opportunities that can improve livelihoods and drive economic growth. But this growth comes with challenges like climate change, resource depletion, and environmental damage. At Finance in Motion, we channel capital into projects that address these challenges head-on—whether it's financing renewable energy, supporting MSMEs, or enabling green infrastructure development. Our goal is to support economic development that contributes to preserving natural resources and ecosystems for future generations.

Our expertise: proven, local, focused

Founded in Germany 15 years ago, Finance in Motion has grown into a global leader in impact investing. We have developed an extensive presence in local markets through our 14 regional offices, enabling us to actively manage investments and monitor progress in real time. This hands-on approach is essential to ensuring our investments deliver measurable impact and sustainable growth, both for the planet and for the communities we serve.

Committed to transparent and lasting impact

Our impact management system is independently verified, and we adhere to the highest standards of governance and environmental, social, and governance (ESG) compliance. As an Article 9 fund manager under European regulations, we focus exclusively on sustainable investments, ensuring that our decisions contribute to meaningful and lasting change.

Your doorway to investments that matter

We believe that capital must be invested with the purpose of creating lasting, positive outcomes for both people and the planet. Our role extends beyond simply managing assets – we work to close not just funding gaps but also gaps in knowledge, skills, and infrastructure within the markets we serve. Through dedicated capacity-building initiatives, we help create stronger, more resilient economies that are prepared to meet both current and future challenges.
